

ABOUT HPOWER

hpower actuators combine fastest response times in μs , superior kHz dynamics, high force generation in the range of tens of kN and nanometer precision in a way that is unmatched by any other linear driving system. The actuation can be obtained without any mechanical wear, making the actuators extremely durable. hpower products include ring and stack type actuators, as well as shakers and shock generators. hpower is the result of the collaboration between piezosystem jena and Piezomechanik GmbH and therefore combines centuries of piezo expertise with new innovations.

PIEZOELECTRIC SHAKER PISHA

PIEZOELECTRIC SHAKER
WITH HIGH-BANDWIDTH AMPLIFIER

Concept

Piezo shaker made by **hpower** put the electrical excitation signal directly into a high-frequency **motion**. The amplitude of the shaker motion is determined by the operating voltage, whereas the speed of the movements is determined by the charging current (in the sub-resonant mode). The internal structure of the shaker is adapted to the occurring high forces, pressures and accelerations. So the **piezoelectric shaker** achieves a highly reliable and repeatable operation under oscillation at a continuous load.

Product highlights

- working frequency up to 70kHz
- max. amplitude 12 μm
- max. force modulation 50000 N
- thermostable
- high resonant frequency

Applications:

MODAL
ANALYSIS

VIBRATION
CONTROL

MATERIAL
TESTING

MECHANICAL
ENGINEERING

Technical data of PiSha shaker

type	motion, μm	voltage range, V	Length, mm	diameter, mm	resonant frequency, kHz	Blocking force, N	Capacity, nF	Stiffness, N/ μm
